### ALFALFA FOR HAY.

The farmers of this section may find something to their advantage in perusing the subjoined article from the San Francisco Bulletin, especially as this is particularly the leading interest of our county, and a bonanza to all:

Formerly there was a very strong prejudice against alfalfa for hay, especially for horses. It was considered good enough for cattle, but too coarse for horses. The principal reason for this prejudice was found in the fact that we did not know in the first place how to sow alfalfa, and in the next place when to cut it and how to use it. Years of experience have taught our farmers what there is in both these points, and now alfalfa is the best hay produced in California, if not the best produced in any other country. Alfalfa seed wants to be sown thick, at least 25 pounds to the acre. If sown this thick, and a good stand is obtained, the clover grows fine, the stems being tender and juicy, instead of coarse and woody. But even then it must be cut early, or before the seed begins to form. The best time to cut alfalfa for hay is before the blossom is in full development. This is not all. If cut thus early, and then not properly cured, the hay is greatly injured, if not ruined. It must not be dried in the sun, but as soon as wilted should be raked into the windrow and put into small ricks or heaps, to be dried principally by the air, and without direct exposure to the sun. Those who are going to sow alfalfa this spring will bear in mind that one acre thick on the ground will be worth more than two acres standing sparsely on the ground. If you have but a small amount of seed, better sow that on a part of your land and wait till another year to sow the balance. When once seeded it is almost impossible to thicken the stand by sowing new seed with the old clover, from the fact that at any time the new seed would grow, that already on the ground so shades it that it will not germinate. The sowing must be done well at first. Sow thick, and then cut and cure as suggested, and you will have the best of hay for cattle or horses, or any hay-eating animals.

**DONATION FOR SCHOOL PURPOSES.**—C. T. Mills, D. D., has just donated the property known as Mills' Seminary, at Oakland, to a Board of Trustees, consisting of Governor H. H. Haight, Mayor Bryant, E. D. Sawyer, J. O. Eldridge, Rev. Dr. Lathrop, Rev. Dr. Dwinelle, Rev. Dr. Ellis, Colonel B. Simpson, W. A. Bray, William Meek and others, to be held by them and their successors forever under an Act of incorporation for the education of the young ladies of the Pacific coast.

**CALIFORNIA CLEAN-UP.**—The clean-up from the mills crushing California came in Wednesday. The total shipments for the fiscal month of twenty-two days will, when made, aggregate over \$1,800,000.

**Bienvenu.**—The Bienvenu Club of Carson, will give another of their reception parties at Theater Hall, Carson, Tuesday evening, February 13. Dancing will commence at 9 o'clock. This party has been appropriately appointed for the eve of St. Valentine's day.

The bonded debt of the city of New York is \$148,107,537. A bill is before the Legislature limiting the power of the City Government to create a debt in excess of \$150,000,000. If the increase of Municipal, State and National indebtedness is not soon stopped by economic management it will be ended in a summary manner—by absolute repudiation.

Conscience has no more to do with gallantry than it has with politics.—(Richard Brinsley Sheridan.)

FRIDAY, FEBRUARY 9, 1877

## NEWS OF THE MORNING.

Keene, Park, Rufus Hatch and others were in the recent pool operating for a rise in the Western Union, Keene taking over 20,000 shares. There was no bad faith among the operators as sensationally charged. There were no differences of opinion among the members and they formally agreed to dissolve. Then Park promptly sold out, Hatch and the others holding, confident that it is a good speculation because of Western Union's innate strength.

It is believed that Midhat Pasha will really control the Turkish Government and is only retired temporarily to permit concession. It is asserted that Midhat's difference with the Sultan arose from the refusal of the latter to dismiss Sofvet Pasha, with whom Midhat disagreed as to the terms to be offered to Serbia.

Secretary Morrill was rather better yesterday, and may recover. The pneumonic symptoms are disappearing, but his condition is yet very critical.

Rear-Admiral Wilkes, of the United States Navy retired, died yesterday morning.

The Democrats are despondent and the Republican jubilant all over the Union at the decision made by the Electoral Commission on Florida's vote.

The English Parliament opened yesterday. Queen Victoria called it to order and made a speech reviewing the Turkish question, the famine in India and colonial and home matters.

The Pope desires all Cardinals to attend the next Consistory, which is to be of extraordinary importance.

## THE BULLION TAX.

The Storey Board of Commissioners yesterday considered the bullion tax question. Mr. Fair, Superintendent of the Con. Virginia and California mines, made a tabular statement, in which he said that the two mines owed \$290,275 91. Judge Lewis submitted the following resolution of amendment to the bullion tax law: "All ores, tailings and mineral-bearing materials of whatever character shall be assessed for purposes of taxation for State and county purposes in the following manner: On all ores, tailings or mineral-bearing material, the gross yield or value of which is \$12 per ton or less, there shall be deducted the sum of 90 per centum of such gross yield, return or value. On all ores, etc., the gross yield or value of which is over \$12 and under \$30 per ton, there shall be deducted 80 per centum of such gross yield, value or return. On all ores, etc., the gross yield or value of which is over \$30 and less than \$100 per ton, there shall be deducted from such gross yield, value or return, 60 per centum. On all ores, etc., over \$100 per ton, there shall be deducted 50 per centum of such gross yield, value or return. The remainder shall be deemed the net proceeds, and shall be assessed and taxed as provided for in this Act."

Judge Lewis said he considered this a much plainer, juster and more satisfactory provision than the one before submitted to him by certain of the Commissioners, and he had no doubt the State Controller would be perfectly satisfied with it.

Mr. Fair said this was satisfactory to the bonanza firm; that he thought the Legislature would pass it; that if passed his companies would pay in full their delinquent taxes; and he made the distinct proposition that if this law passed, and the State tax is reduced from 90 to 80 per cent. as proposed, all taxes now due from his companies would be immediately paid in full, either by check or gold coin, but without any costs.

The proposed compromise was accepted, and the passage of the proposed amendment was recommended to the Legislature.

**AERIAL NAVIGATION**—The believers in aerial navigation will await the coming of March 5th, of the present year, with mingled feelings of expectancy and hope. On that day Mr. Ralph Stott proposes to start his newly-invented flying machine on its first passage from Dover to Calais. He promises to perform the journey across the Channel and return in the space of one hour, no matter what may be the direction of the wind or the state of the atmosphere.

peculiar features as the hamlet above mentioned we cannot forbear calling attention to it. This village is the beggar of Nevada. It is forever crying for the State to locate all of its public buildings within its limits. It wants everything. Let a new institution be mentioned and lo, the brazen-faced village asks it with all the effrontery which long begging has given it. Still, after all, we can hardly wonder at its solicitude, for its very existence depends upon the pap it receives from the State and National Governments. Why, were it not for the Mint and the State Capitol, the sagebrush grown streets of Carson and the few shanties erected there would now be the roving places of coyotes and the homes of lads and lizards. It is conical to hear a deluded mortal from that sequestered spot take unto himself the airs so peculiar to shoddy and codfish aristocracy. The subject being noticed by this sketch has the good fortune to be between Virginia City, the metropolis, and Reno, the rising city and future capital of Nevada, and a mile or so from Empire. To these circumstances it owes its existence. A distance out of the "city" is located a prison on an individual's ground and Carson has out-Carsoned itself by asking the State to spend money upon this property, so that by and by the owner can take the land, prison and all and the State be left to whistle for a place to keep its criminals. For subtlety of cheek, for penuriousness, for shoddy, for would-be importance, give us Carson City. For enterprise, thrift, and prosperity recommend us any other place first. With half its business houses closed; the majority of its residences built behind a sign "To Let," with mud up to your ankles on the street crossings and break-neck holes in the sidewalks; with a few office-holders and a multitude of sharks clamoring for positions with no work and big salaries, this place, this village, this "thing" arrogates to itself the place of a capital city. Verily "whom the gods would destroy they first make mad." Should any one wish to find the place where the poor Legislators are exiled to we can only refer them to Eagle Valley, and tell them to poke around until they find a few sticks opposite an oyster can, with a Mint and State Capitol in the foreground and Treadway's prison in the distance and you have "Carson City."

A family living in San Leandro, who have a son living in the State of Nevada, were the victims of a cruel joke on Monday. A San Francisco express wagon drove up to the door and unloaded a large box and handed a letter to the head of the family, which stated that their son was dead and that his corpse would be found in the box. After the first outburst of grief had subsided, the box was opened and found to be stuffed with straw. A telegram to Carson City was answered by the son, who was alive and well. The perpetrators of the outrage are unknown.

A loan of money is recorded in San Francisco at 8 per cent. per annum. The amount was \$50,000, and the time of the loan three years. The Sacramento Bee thinks this is one of the signs indicative of better times. With cheap money the manufacturing and industrial interests of the State will be developed rapidly, skilled labor will find more employment and there will be better times generally. And even eight per cent. interest, low though be the rate, comparatively, is full as much as any legitimate business can possibly afford for the use of money in California or elsewhere.

The Los Angeles Express thinks the deposit of coal recently discovered near the Arroyo Seco is lignite, of the same character as the coal deposit in Mount Diablo, and that if it is extensive, its location so near that city—four miles—will give it immense value.

The New York city banks are carrying over thirty-eight million dollars in gold. This is a larger amount than they have ever held before, but the bulk of it is said to belong to customers of the banks, who have deposited it, and drawn out greenbacks upon the same.

The San Jose Mercury estimates that the people owe a debt of \$90,000,000 to the soil of California for last year's productions, that being the value of its products in 1876.

Grey gave notice of reconsideration.

The bill failed to pass. Ayes, 19; noes, 27.

**FRANKTOWN, Feb. 8th, 1877.**  
C. C. FOWLER—DEAR SIR: Why do you oppose, through your paper, everything that is for the interest of the people of Washoe Valley. Mr. Boardman presented the bill you speak of upon the petition of the taxpayers of this end of the county.

**YOUR.**  
**MANY TAXPAYERS WASHOE VALLEY.**  
This is a mistake. We do not desire to oppose everything which is to the interests of Washoe Valley. We only desire to guard the County Treasury. If our friends in the Valley can show they really need that road we will not oppose it, but will fully endorse it. But if it is not a necessity we must insist upon the treasury being protected. We have not now nor never have had a desire to oppose the interests of Washoe Valley, but desire to aid it in every way possible. Surely our friends there, as in all other parts of the county, will not think wrong of us if we ask that the county money be expended only where it will do the most good. If that road is needed well and good, but if not, we should think twice before we spend \$10,000.

Every man is said to have at least one chance to acquire wealth. In the case of a newspaper man, this opportunity comes on the 29th of February every year, except leap year.

pet, the Emperor William. It is taken from one of our San Francisco exchanges:

Emperor William of Germany has been in the army just 70 years. He may not be the oldest soldier in the world, but he is the oldest crowned head who has had a connection with the army for seventy years. Emperor William entered the Prussian army in 1807; he was then nine years of age, and received the commission of ensign at Konigsburg. Since he became King of Prussia, and later Emperor of Germany, he has been at the head of the army. He led the Prussians in 1866 against the Austrians, and was victorious at almost every step. He led the German army as Commander-in-Chief in the invasion of France, and was victorious again. In fact all these seventy years Emperor William has lost very few battles. He has been a successful military commander, and has gained most of his victories by hard fighting. This old man was 72 years old when he placed himself at the head of the German army to repel the invasion of France. He fought with all the pluck and endurance of a young man, who could both take and give hard blows. At the age of 79 years he is good for another campaign or two, and would probably be in the saddle again at the head of his great army in case war should break out.

He has had the good fortune to have two great subordinate leaders, viz.: Von Moltke and Bismarck. But the Emperor of Germany is himself a man of brains, and has a far more successful military record than either of the Napoleons. He has never fought so many battles as the elder Napoleon; neither has he ever met with so many reverses. The Emperor is what in common parlance might be called a gamey old boy. On the completion of his seventieth year of military service the Crown Prince and other dignitaries of the realm waited on the Emperor to congratulate him on the completion of this long term of military service. It is also known that the Emperor has the best organized army in the world; and both he and Bismarck appear to be conscious of it in all diplomatic conferences with other powers.
